

## Osman BOLAT

### Industrial Engineering

#### ABOUT

By combining the knowledge, I gained during the university period with the experience I gained in the companies I worked for, I aim to work on innovative and continuous progress within a well-established and large company like yours. I plan to carry out studies that will increase the quality of the company by working with a focus on customers and quality. As a result of giving me a chance, I aim to gain a permanent place in your company by achieving controlled development with your company, which is the Pioneer and follower of technological and strategic developments in the sector.

#### WORKING EXPERIENCE

##### TUPRAS(KIRIKKALE)

Planning Engineer (İntern) (July 2023 - July 2023)

- I learned the process of obtaining the required amount of white product with the desired properties by processing the crude oil in different units. I learned that some of the tanks are sales tanks, and some are spare tanks, how to follow the occupancy rate of the tanks containing the ready-to-sale product, and how to prepare for sale.

##### DORA MAKINA(ANKARA)

Planning Engineer (Candidate Engineer) (June 2021 - September 2021)

- Aselsan, Roketsan, TAI etc. in the CANIAS program, I learned to follow the factory production of the parts requested by the business partner companies and to control the ERP and MRP systems. I learned about the process of Quality Control, Production planning, Quality Process Management, Weld Inspection, Levelling and Production, and Milling and Turning units.

##### Mercedes-Benz Aydoğanlar Otomotiv (ANKARA)

Service Consultant (İntern) (July 2017- August 2017)

- To follow up the maintenance and repair processes required for vehicles.

##### Mossback Restaurant (OHIO/USA)

Kitchen Helper (June 2022- September 2022)

- I have been on the island of Put in bay, OHIO, USA for 5 months with the Work and Travel program. I had the opportunity to meet people from different cultures and improve my English there.

##### LC WAIKİKİ(ANKARA)

Cashier assistant manager (November 2016- May 2022)

#### PROJECT AND SEMINARS

2017: Electric Bike

2022: HACETTEPE Career Fair

2022: Production Process Optimization

2023: Refinery Model Optimization
